Safety instructions

This manual explains the proper installation and use of your appliance, please read it carefully before using even if you are familiar with the product. The manual should be kept in a safe place for future reference. In case of failure, only the Authorized Technical Service may repair this hob. Otherwise the guarantee will be null and void.

Warning

General safety

- The appliance may only be installed and connected by trained, registered service engineers.
- Built-in appliances may only be used after they have built in to suitable built-in units and work surfaces that meet standards.
- In the event of faults with the appliance or damage to the glass ceramic(cracks, scratches or splits), the appliance must be switched off and disconnected from the electrical supply, to prevent the possibility of an electric shock.
- Repairs to the appliance must only be carried out by trained registered service engineers.
- The technical and identification data for the hob figure on the reference plate fixed to the appliance.
- This reference plate must be consulted before making the electrical connections.
- The electrical connections must be made by specialist aware to the legal and regulatory, requirements in each country.
- If the cable is damaged in any way it must be replaced by the manufacturer or after sale service or by authorized technical staff, to avoid hazard.
- Power line connection: The power cord should be connected in compliance with the relevant standard, to a 3×20A omni-polar circuit breaker.
- If the appliance is being connected directly to the mains an Omni-polar circuit-breaker must be installed with a minimum opening of 3mm between contacts.

Correct use

- People (including children) who, because of their physical, sensory or mental capabilities or their inexperience or ignorance are not able to use the device safely, should not use this device without supervision or instruction by a responsible person.
- The appliance is not intended to be operated by means of an external timer or separate remote-control system.
- This appliance should be used only for normal domestic cooking and frying of food.
- The appliance must not be used as a work surface or as a storage surface.
- Additions or modifications to the appliance are not permitted.
- Do not place or store flammable liquids, highly inflammable materials or fusible objects (e.g. plastic film, plastic, aluminum) on or near the appliance.
- After being used for a long time, the corresponding heating zone of the induction hotplate is still hot. Never touch the ceramic surface to avoid burning.
- Do not heat an empty pan on the appliance.

Children's safety

- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- The cooking zones will become hot when you cook. Therefore, always keep small children away from the appliance.
- The appliance is not intended for use by young children or infirm persons without supervision.

- Young children should be supervised to ensure that they do not play with the appliance.
- To avoid small children and pets unintentionally switching the appliance on, we recommend activation of the child safety device.

Safety during use

- Remove stickers and film from the glass ceramic.
- There is the risk of burns from the appliance if used carelessly.
- Cables from electrical appliances must not touch the hot surface of the appliance or hot cookware.
- Overheated fats and oils can ignite very quickly. Warning! Fire hazard!
- Switch the cooking zones off after each use.
- Users with implanted pacemakers should keep their upper body at least 30 cm from induction cooking zones that are switched on.
- Risk of burns! Do not place objects made of metal, such as knives, forks, spoons and saucepan lids on the cooking surface, as they can get hot.

Safety when cleaning

- For cleaning, the appliance must be switched off and cooled down.
- For safety reasons, the cleaning of the appliance with steam jet or high pressure cleaning equipment is not permitted.

How to avoid damage to the appliance

- The glass ceramic can be damaged by objects falling onto it.
- The edge of the glass ceramic can be damaged by being knocked by the cookware.
- Cookware made of cast iron, cast aluminum or with damaged bottoms can scratch the glass ceramic if pushed across the surface.
- Objects that melt and things that boil over can burn onto the glass ceramic and should be removed straightaway.
- Do not use the cooking zones with empty cookware or without cookware.
- To avoid damaging cookware and glass ceramics, do not allow saucepans or frying pans to boil dry.
- The ventilation gap of 5mm between the worktop and front of the unit underneath it must not be covered.

 DISPOSAL: Do not dispose this product as unsorted municipal waste. Collection of such waste separately for special treatment is necessary.	By ensuring that this appliance is disposed of correctly, you will help prevent any possible damage to the environment and to human health, which might otherwise be caused if it were disposed of in the wrong way. The symbol indicates that it may not be treated as normal household waste. It should be taken to a collection point for the recycling of electrical and electronic goods. This appliance requires specialist waste disposal. For further information regarding the treatment, recover and recycling of this product please contact your local council, your household waste disposal service, or the shop where you purchased it. For more detailed information about treatment, recovery and recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

		50/60Hz			

Installation

Before you install the hob, make sure that

- the work surface is square and level, and no structural members interfere with space requirements
- the work surface is made of a heat-resistant material and at least 30mm thick.
- if the hob is installed above an oven, the oven has a built-in cooling fan
- the installation will comply with all clearance requirements and applicable standards and regulations
- a suitable isolating switch providing full disconnection from the mains power supply is incorporated in the permanent wiring, mounted and positioned to comply with the local wiring rules and regulations. The isolating switch must be of an approved type and provide a 3 mm air gap contact separation in all poles (or in all active [phase] conductors if the local wiring rules allow for this variation of the requirements)
- the isolating switch will be easily accessible to the customer with the hob installed
- you consult local building authorities and by-laws if in doubt regarding installation
- you use heat-resistant and easy-to-clean finishes (such as ceramic tiles) for the wall surfaces surrounding the hob.

When you have installed the hob, make sure that

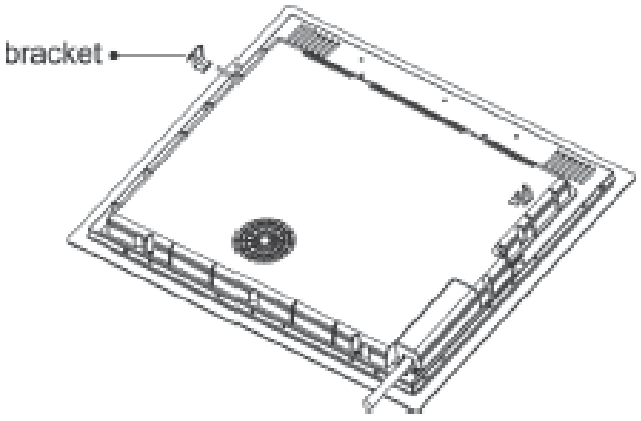
- the power supply cable is not accessible through cupboard doors or drawers
- there is adequate flow of fresh air from outside the cabinetry to the base of the hob
- if the hob is installed above a drawer or cupboard space, a thermal protection barrier is installed below the base of the hob
- the isolating switch is easily accessible by the customer

Before locating the fixing brackets

The unit should be placed on a stable, smooth surface (use the packaging). Do not apply force onto the controls protruding from the hob.

Adjusting the bracket position

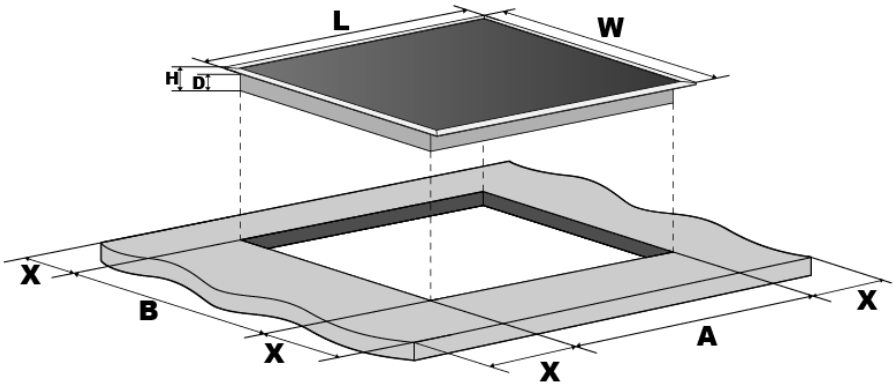
Fix the hob on the work surface by screw 2 brackets on the bottom of hob(see picture) after installation. Adjust the bracket position to suit for different table top thickness.

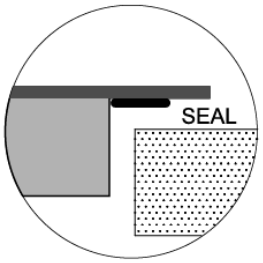


Cautions

- The induction hotplate must be installed by qualified personnel or technicians. We have professionals at your service. Please never conduct the operation by yourself.
- The hob will not be installed directly above a dishwasher, fridge, freezer, washing machine or clothes dryer, as the humidity may damage the hob electronics
- The induction hotplate shall be installed such that better heat radiation can be ensured to enhance its reliability.
- The wall and induced heating zone above the table surface shall withstand heat.
- To avoid any damage, the sandwich layer and adhesive must be resistant to heat.

1. Cupboard Cutting



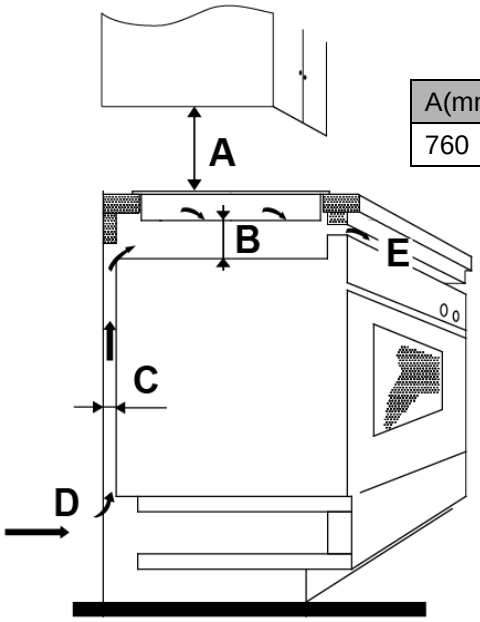


L(mm)	W(mm)	H(mm)	D(mm)	A(mm)	B(mm)	X(mm)
590	520	60	56	560+4 +1	490+4 +1	50 mini

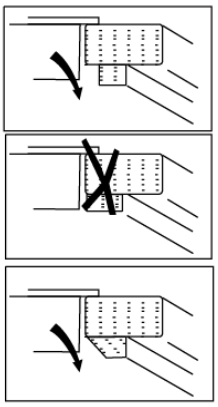
Important

Under any circumstances, make sure the Induction cooker hob is well ventilated and the air inlet and outlet are not blocked. Ensure the Induction cooker hob is in good work state. As shown below

Note: The safety distance between the hotplate and the cupboard above the hotplate should be at least 760mm.



A(mm)	B(mm)	C(mm)	D	E
760	50 mini	20 mini	Air intake	Air exit 5mm



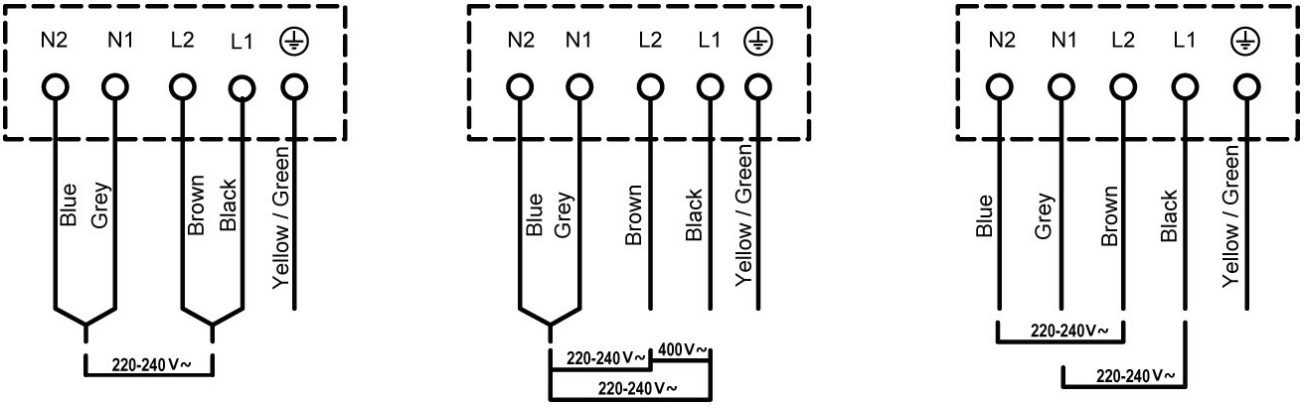
2. Electrical connection.

Important:

- the domestic wiring system is suitable for the power drawn by the hob.
- the voltage corresponds to the value given in the rating plate
- the power supply cable sections can withstand the load specified on the rating plate.

- To connect the hob to the mains power supply, do not use adapters, reducers, or branching devices, as they can cause overheating and fire.
- The power supply cable must not touch any hot parts and must be positioned so that its temperature will not exceed 75˚C at any point.
- Check with an electrician whether the domestic wiring system is suitable without alterations. Any alterations must only be made by a qualified electrician.
- If the cable is damaged or to be replaced, the operation must be carried out the by after-sale agent with dedicated tools to avoid any accidents.
- If the appliance is being connected directly to the mains an omnipolar circuit-breaker must be installed with a minimum opening of 3mm between contacts.
- The installer must ensure that the correct electrical connection has been made and that it is compliant with safety regulations.
- The cable must not be bent, kinked or compressed.
- The cable must be checked regularly and replaced by authorised technicians only.

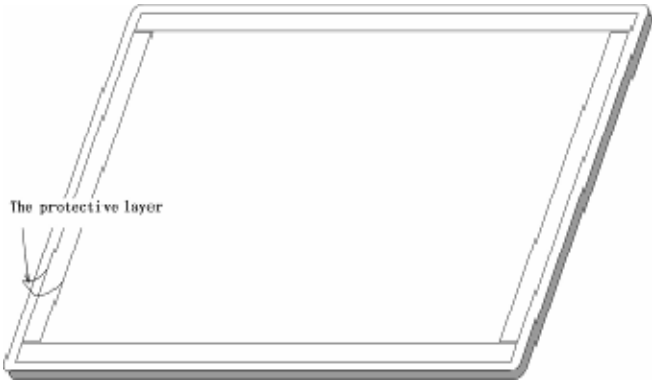
Step 1: Undo screws, open terminal board cover at rear panel of appliance, make connection as per below



Step 2: close the cover and complete electrical connection.

3. Finally fix the appliance

1. Place the hob face down on a table.
2. Remove the protective layer.
3. Place the hob in the hole made in the cupboard,
4. pressing it firmly in so that it is closed off by the seal.

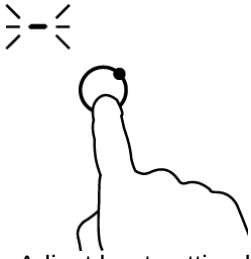


Start using your appliance

Description	Explanation
Zone indicators	These show the above touch control sensor is controlling which zone of the appliance.
Control to Increase/decrease power or increase/decrease of timer	Power setting of the zones, from 0 to 9, for example, this display shows lower-right-hand zone power selected at level 6.
Timer	You can use it as a simple minute minder or timer to control one or more zones. Max timer setting is 99min.
Child lock	Touch it to lock keys(display show “Lo”) and press and hold for a while to unlock. When it is activated, none of the other buttons can be activated except for On/Off.
On/Off	Turn on/off the appliance. You will see “0” display above power setting when turn on the appliance.
Residual heat indicator	An H lights up on the power display to indicate that a particular zone is very hot and should not be touched. It may remain on up to approximately 30 minutes. Depending on the power setting selected. Energy saving tips: It can also be used as an energy saving function if you want to pre-heat further pans, use the zone that is still with “H”.

Start cooking

1. Power on the unit, the buzzer beeps once, all displays show " – " or " – – ", indicating that the induction hob has entered the state of standby mode.
2. Touch the ON/OFF ⏻ control.
3. Place a suitable pan on the cooking zone that you wish to use, make sure the bottom of the pan and the surface of the cooking zone are clean and dry
4. Touching the heating zone selection control , and a indicator next to the key will flash.



5. Adjust heat setting by touching the "-" or "+" control.

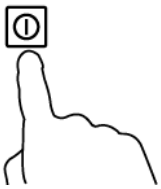
NOTE:

- If you don't choose a heat setting within 1 minute, the Induction hob will automatically switch off. You will need to restart from step 2.
- You can modify the heat setting at any time during cooking.
- Your induction cooktop can automatically detect if the pan you placed is suitable or not, when display flashes then the pan is not suitable for this appliance.

Finish cooking

1. Touching the heating zone selection control that you wish to switch off
2. Turn the cooking zone off by scrolling down to"0" or touching"-" and"+" control together. Make sure the display shows"0"

3. Turn the whole cooktop off by touching the ON/OFF control.



Work with timer:

You can use the timer in two different ways:

- You can use it as a minute minder. In this case, it will not turn any cooking zone off when the set time is up.
- You can set it to turn one or more cooking zones off after the set time is up.
- You can set the timer up to 99 minutes.

Example：To set it as 95 minute minder

1. Make sure the cooktop is turned on.
   Note: you can use the minute minder even if you're not selecting any cooking zone.
2. Touch timer control, the minder indicator starts flashing and "10" will show in the timer display.

3. Set the time by touching the "-" or "+" control of the timer. Single click will increase/decrease by 1 min, press and hold will increase/decrease by 10 min.

4. Till 95min set, touch timer control again to confirm setting.
5. When the time is set, it will begin to count down immediately. The display will show the remaining time
6. Buzzer will beep for 30 seconds and the timer indicator shows "- - " when the setting time finished.

NOTE:

- Minute minder won't interrupt cooking progress but just give a sound beep.

Example：To set it as 95 minute timer

1. Touch the heating zone selection control that you want to set the timer for.
2. Touch timer control, the minder indicator starts flashing and "10" will show in the timer display

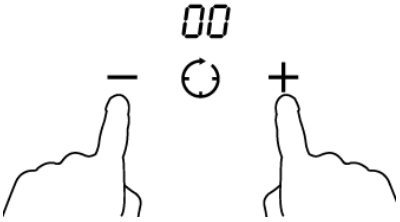
3. Set the time by touching the "-" or "+" control of the timer. Single click will increase/decrease by 1 min, press and hold will increase/decrease by 10 min.
4. Till 95 min set, touch timer control again to confirm setting
5. When the time is set, it will begin to count down immediately. The display will show the remaining time.
6. When time is up, the corresponding cooking zone will be switch off automatically.

NOTE:

- You can repeat above step 1 to 5 to set other zones
- The red dot next to power level indicator will illuminate indicating that zone is selected.
- When several timers zones are set, display only show the shortest timer duration.
- If you want to see timer setting for a particular zone, simply touch the zone selection button.

Cancel the timer:

1. Touching the heating zone selection control that you want to cancel the timer
2. Touch the "-" and "+" together to cancel timer setting. Display will show 00.



Cooking tips:

Heat setting	Suitability
1 - 2	• delicate warming for small amounts of food • melting chocolate, butter, and foods that burn quickly • gentle simmering • slow warming
3 - 4	• reheating • rapid simmering • cooking rice
5 - 6	• pancakes
7 - 8	• sautéing • cooking pasta
9	• stir-frying • searing • bringing soup to the boil • boiling water

When food comes to the boil, reduce the temperature setting.

- Using a lid will reduce cooking times and save energy by retaining the heat.
- Minimize the amount of liquid or fat to reduce cooking times.
- Start cooking on a high setting and reduce the setting when the food has heated through.

Simmering, cooking rice

- Simmering occurs below boiling point, at around 85˚C, when bubbles are just rising occasionally to the surface of the cooking liquid. It is the key to delicious soups and tender stews because the flavours develop without overcooking the food. You should also cook egg-based and flourthickened sauces below boiling point.
- Some tasks, including cooking rice by the absorption method, may require a setting higher than the lowest setting to ensure the food is cooked properly in the time recommended.

Searing steak

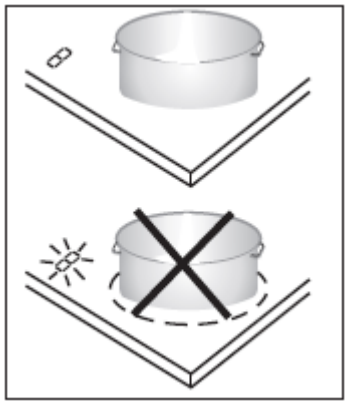
To cook juicy flavoursome steaks:

1. Stand the meat at room temperature for about 20 minutes before cooking.
2. Heat up a heavy-based frying pan.
3. Brush both sides of the steak with oil. Drizzle a small amount of oil into the hot pan and then lower the meat onto the hot pan.
4. Turn the steak only once during cooking. The exact cooking time will depend on the thickness of the steak and how cooked you want it. Times may vary from about 2 – 8 minutes per side. Press the steak to gauge how cooked it is – the firmer it feels the more ‘well done’ it will be.
5. Leave the steak to rest on a warm plate for a few minutes to allow it to relax and become tender before serving.

For stir-frying

1. Choose an induction compatible flat-based wok or a large frying pan.
2. Have all the ingredients and equipment ready. Stir-frying should be quick. If cooking large quantities, cook the food in several smaller batches.
3. Preheat the pan briefly and add two tablespoons of oil.
4. Cook any meat first, put it aside and keep warm.
5. Stir-fry the vegetables. When they are hot but still crisp, turn the cooking zone to a lower setting, return the meat to the pan and add your sauce.
6. Stir the ingredients gently to make sure they are heated through.
7. Serve immediately.

To choose proper pan



You appliance can tell whether the pan you are using is suitable or not. If the power indicator is flashing, that means pan is not suitable and won't heat up. Following up below points will help you choose proper pan.

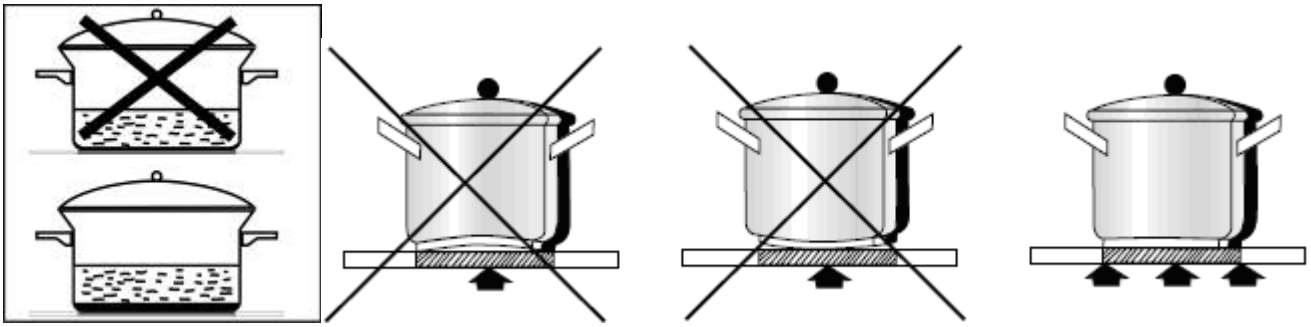
1. Choose proper pan bottom size

Zone Diameter(mm)	Suggested minimum pan bottom diameter(mm)
160	140
180	160

2. Choose proper pan base

Different types of pan are suitable for induction cooking, but those with a thick base are the best.

It is recommended to use flat-bottom pans with. Do not use pans with a rough base to prevent scratching the heat surface of the cooktop

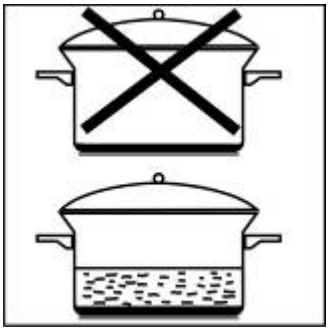


3. Choose proper pan material

Glass, ceramic, earthen-ware, aluminum, copper and non-magnetic stainless steel pans are generally unsuitable. However, enameled stainless steel pans with a special base suitable for induction cooking may be used (make sure the pan is labeled as suitable for induction cooking).

Caution:

- Avoid scraping the glass of the hob when you move the pans. Lift them up to move.
- Do not leave any cooking utensils on the hob when it is switched on. It could detect them as pans and heat them up.
- Never heat an empty pan.

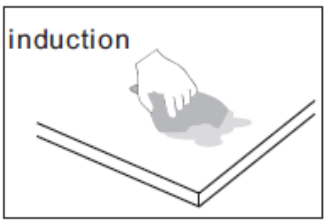


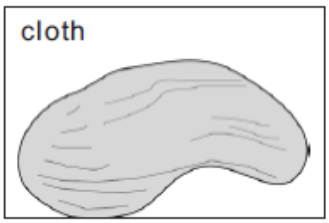
Maintenance & Troubleshooting

Caution:

Before maintenance or cleaning is carried out, the range hood should be disconnected from the main power supply. Ensure that the range hood is switched off at the wall socket and the plug removed.

- Spills and splashes will not harden and stick to the glass, as it hardly heats up.
- Both Vitro-ceramic and induction rings should however be cleaned of any spills or splashes as quickly as possible.
- Slight stains can be removed with kitchen paper or cloth. Do not use steam clearer.
- More resistant stains will need specific product for vitro-ceramic glass. Follow each product's inductions.





What?	How?	Important!
Everyday soiling on glass (fingerprints, marks, stains left by food or non-sugary spillovers on the glass)	1. Switch the power to the cooktop off. 2. Apply a cooktop cleaner while the glass is still warm (but not hot!) 3. Rinse and wipe dry with a clean cloth or paper towel. 4. Switch the power to the cooktop back on.	● When the power to the cooktop is switched off, there will be no 'hot surface' indication but the cooking zone may still be hot! Take extreme care. ● Heavy-duty scourers, some nylon scourers and harsh/abrasive cleaning agents may scratch the glass. Always read the label to check if your cleaner or scourer is suitable. ● Never leave cleaning residue on the cooktop: the glass may become stained.
Boilovers, melts, and hot sugary spills on the glass	Remove these immediately with a fish slice, palette knife or razor blade scraper suitable for Induction glass cooktop, but beware of hot cooking zone surfaces: 1. Switch the power to the cooktop off at the wall. 2. Hold the blade or utensil at a 30° angle and scrape the soiling or spill to a cool area of the cooktop. 3. Clean the soiling or spill up with a dish cloth or paper towel. 4. Follow steps 2 to 4 of 'Everyday soiling on glass' above.	● Remove stains left by melts and sugary food or spillovers as soon as possible. If left to cool on the glass, they may be difficult to remove or even permanently damage the glass surface. ● Cut hazard: when the safety cover is retracted, the blade in a scraper is razor-sharp. Use with extreme care and always store safely and out of reach of children.
Spillovers on the touch controls	1. Switch the power to the cooktop off. 2. Soak up the spill 3. Wipe the touch control area with a clean damp sponge or cloth. 4. Wipe the area completely dry 5. with a paper towel. 6. Switch the power to the cooktop back on.	The cooktop may beep and turn itself off, and the touch controls may not function while there is liquid on them. Make sure you wipe the touch control area dry before turning the cooktop back on.

Error code

If an abnormality comes up, the induction hob will enter the protective state automatically and display corresponding protective codes:

Code	Possible causes	What to do
F3-F8	Temperature sensor failure	Call service center
F9-FE	Temperature sensor of the IGBT failure.	Call service center
E1/E2	Abnormal supply voltage	Please inspect whether power supply is normal. Power on after the power supply is normal.
E3/E4	Abnormal temperature	Please inspect the pot.
E5/E6	Bad induction hob heat radiation	Please restart after the induction hob cools down.

Over-Temperature Protection

A temperature sensor equipped can monitor the temperature inside the Induction hob. When an excessive temperature is monitored, the Induction hob will stop operation automatically.

Detection of Small Articles

When an unsuitable size or non-magnetic pan (e.g. aluminium), or some other small item (e.g. knife, fork, key) has been left on the hob, the hob automatically go on to standby in 1 minute. The fan will keep cooking down the induction hob for a further 1 minute.

Auto Shutdown Protection

Auto shut down is a safety protection function for your induction hob. It shut down automatically if ever you forget to turn off your cooking. The default working times for various power levels are shown in the below table: .

Power level	1	2	3	4	5	6	7	8	9
Default working timer (hour)	8	8	8	4	4	4	2	2	2

When the pot is removed, the induction hob can stop heating immediately and the hob automatically switch off after 2 minutes.

People with a heart pace maker should consult with their doctor before using this unit.

WARRANTY

1.1 In this warranty:

1.1.1 Australian Consumer Law means the law as set out in Schedule 2 of the Competition and Consumer Act 2010;

1.1.2 **Company** means GSM Sales Pty Ltd ABN 53 007 682 475 of 142-144 Fullarton Road, Rose Park SA 5067. Telephone 08 8122 2390. Email admin@gsmsales.com.au;

1.1.3 **Consumer** means a "consumer" as that term is defined in Section 3 of the Australian Consumer Law as the original purchaser of a Bellini product;

1.1.4 **Consumer Guarantees** means the guarantees under the Australian Consumer Law;

1.1.5 **You** means the Consumer.

1.2 Nothing in this warranty affects any person's rights under the Australian Consumer Law. The benefits to any Consumer under this warranty are in addition to the rights and remedies available under any Consumer Guarantees.

1.3 Subject to the other clauses of this warranty, the Company warrants to the Consumer that the Bellini product will be free of manufacturing defects and will perform to the Company's specifications.

1.4 The benefit of this warranty extends only to the Consumer as original purchaser of a Bellini product which is installed in a residential property.

1.5 This warranty commences on the date of purchase of the Bellini product by the Consumer and continues for the benefit only of the Consumer until the expiry of two (2) year **(Warranty Period)**.

1.6 If within the Warranty Period a manufacturing defect is discovered in the Bellini product or it fails to perform to the Company's specifications as a result of some defect in materials, components or workmanship (Defect) then the Company will, at its option, repair the Bellini product or supply a replacement Bellini product free of charge. A replacement Bellini product may differ from the original product purchased by the Consumer.

1.7 This warranty will not apply to any Bellini product:

1.7.1 Installed by any person other than a qualified tradesperson; or

1.7.2 Subjected to misuse, neglect, negligence or accidental damage; or

1.7.3 Operated in any way contrary to any operating or maintenance instructions; or

1.7.4 Improperly handled, installed or maintained; or

1.7.5 Altered or modified prior to or after installation; or

1.7.6 Damaged directly or indirectly by power surges, electrical storm damage or connection to incorrect power supply

The Australian Consumer Law requires the inclusion of the following statement with this warranty:

Our goods come with guaranteed that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY THE CONSUMER MUST CALL 1300 373 199 (AUSTRALIA) OR 0508 123 108 (NEW ZEALAND) TO CONNECT TO THE NEAREST AUTHORISED CENTRE

1.8 You must provide proof of your purchase of the Bellini product and the date of purchase in order to obtain the benefit of this warranty.

1.9 If you live outside the service area of the Company or one of its service agents, this warranty does not cover the cost of transport of the Bellini product for service nor the service agent's traveling costs to and from your home.

1.10 If you are required to transport the Bellini product to the Company or its service agent, you must ensure it is safely disconnected by a qualified tradesman and securely packed and insured. The Company does not accept any responsibility for loss or damage of the Bellini product prior to it being received by the Company or its service agent.

1.11 You will be responsible for all costs of returning a Bellini product to the Company and for redelivery of the Bellini product by the Company (whether it is the original or a repaired and/or a replacement Bellini product) and for any other expenses you incur in claiming under this warranty.

1.12 The Company or its service agent will examine any Bellini product and if the Company determines that it is defective through no fault of the Owner and is otherwise undamaged, the Company will repair or replace the Bellini product in accordance with this warranty.

DO NOT SEND IN THIS WARRANTY

Fill out the following details and file with your purchase invoice.

RETAIN & FILE WITH YOUR RECEIPT

Your Purchase Receipt/Invoice is proof of date of purchase. If you are unable to establish the date of purchase, or if the fault is not covered by this warranty, or if the product is found to be in working order, you will be required to bear all service call charges.

GSM Sales Pty Ltd reserves the right to discontinue items, modify designs and change specifications without incurring obligation.

Whilst every effort is made to ensure that descriptions, specifications and other information in this publication is correct, no warranty is given in respect thereof and the company shall not be liable for any errors therein.
